

# galvanising

Working to improve quality, minimise costs and reduce environmental impact

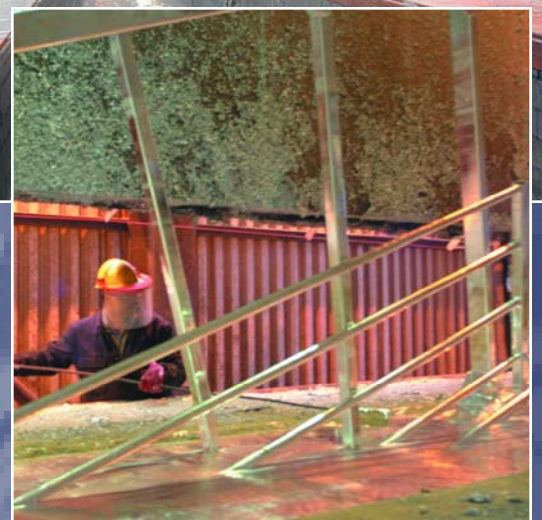

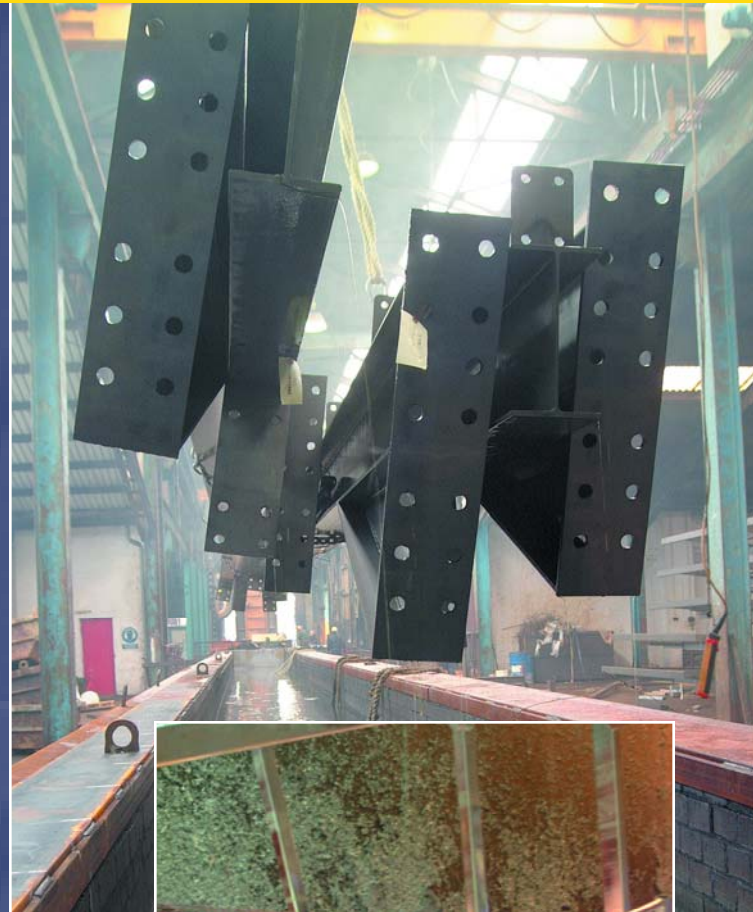

Working hand in hand with the industry we provide a range of galvanising services and products to help you optimise your process operations. We offer advanced solutions for:

- Efficient cleaning mediums
- Degreasing technology
- Acid inhibitors
- Surface preparation of steel
- Indefinite lifetime fluxing solutions
- Zinc passivators
- High quality finishing.

These essential services are further enhanced through our support services and access to expert staff for technical information and advice:

- On site support in testing solutions
- Laboratory facilities
- Technology development
- Training in galvanising pre-treatment technology
- 'Good working practice' guidance manuals.

Our on going investment in research and development ensure we remain at the forefront of innovative thinking and design so that you are kept at the cutting edge of technological advances.

“We provide complete solutions, helping to increase efficiency, drive down costs and develop improved environments for business”.

Gramos Applied is a world leader in the supply of specialist chemicals, providing a total package of products and support services through an extensive sales force and distributor network. We supply over 3000 high performance chemicals, products and services to companies in different industries across the globe.

Our philosophy is to work in partnership with our customers, to understand their processes from the inside and to identify areas for potential improvement. Because Gramos Applied work as part of the team we grow with our customers, contributing to their success and helping shape their future.

Our UK operations are based at an extensive purpose built manufacturing site in the heart of the West Midlands where we manufacture and distribute products. As well as our products being manufactured to ISO 9000:2000 standards, the site itself has obtained ISO 14001 so that when you purchase from us you have definite peace of mind.
